PEAK RISER

Made from a high-quality thermoplastic material, its elasticity and rubber-like texture effectively disperses weight evenly. Peak can be laid flat, upright like a pyramid, or even interlocked together, creating versatility in height. Use four of them to elevate a platter or one to use under a bowl. Its material makes it non-slippery and very convenient to use to use in a self service buffet. Its durability and modern design make it an excellent addition to any food presentation. Peak will take your food display to new heights.

PLASTICS

MELAMINE

Outperforms traditional ceramic and proven to be 4x stronger. Chip and break resistant, ideal for event caterers. A favourite for waiting staff as look like ceramic but with half the weight.

There is a common misperception that plastics use a large amount of the world's petroleum. Less than 4% of the world's oil production goes to produce all types of plastics. PET accounts for less than 1/2 of 1%. PET is fully recyclable, it's a highly sustainable material. Every time a PET container is recycled, its petroleum feedstocks can be recaptured and reused.*

*Source: PlasticsEurope

POLYSTYRENE (PS)

100% recyclable. Our range of PS products are reusable and not intended for single use. Our most popular platter range for caterers who need a reliable solution. Strong, lightweight, ideal for canapes and outdoor events. Event caterers number one choice of platter.

POLYETHYLENE TEREPHTHALATE (PET)

The perfect material for lids. PET is the most widely recycled plastic in the world. Prized for its strength, thermo-stability, and transparency, PET is a popular choice for packaging. PET is also inexpensive, lightweight, resealable, shatter-resistant and recyclable.

PINEWOOD

Completely biodegradable and compostable. So if you are looking for an all-natural way to serve side dishes that will leave a lasting impression without lasting in a landfill for years to come, look no further.
