autumn 2024

Take the sustainable step into autumn

As kitchens bustle with autumn flavours, demand for those hearty, hot dishes increases. Warming bowls of spicy noodles and the familiarity of rich pastas are chosen in favour of the summer-time sandwiches and salads.

But while your customers food preferences may shift through the seasons, their appetite for plastic-free solutions is only going in one direction.

From fan-zones to the food-halls, outdoor markets and office canteens, Notpla's ever-growing takeaway food packaging range makes it easy to reduce your businesses impact on the planet - no matter what the occasion. Made with sturdy FSC® certified board and coated in our unique seaweed barrier, Notpla's packaging is more than up to the task of keeping your Autumnal dishes secure, fresh and looking their best.

Don't miss our latest addition to the lineup - Notpla's Clip & Close Food Box range. Offering all of the natural goodness you've come to expect from Notpla, this latest development delivers reliable, on-the-go convenience thanks to an optional Clip & Close lid design. With a firm, reliable closure these boxes are perfect whether you're catering to stadium crowds or the lunchtime rush hour.

**The unique
superpowers
of Notpla**

1 Made from seaweed,
one of nature's most
renewable resources

2 The only plastic-free
coating under the
Single Use Plastic
Directive

3 Designed for guilt-
free disposal in all
waste streams

Food Containers

Notpla's award-winning collection of takeaway food containers has been designed for a foodservice industry seeking plastic-free packaging options.

100% natural – this is the only range of food packaging to be recognised as plastic-free under the Single Use Plastic Directive.

So, what exactly is a Notpla food-container?

Like you, we weren't happy with the plastics and chemicals hidden in disposable food packaging. So, working with nature, we re-engineered the humble takeaway container, eliminating plastic but maintaining the convenience you demand.

Notpla packaging uses a unique, natural seaweed coating applied to sturdy, FSC® certified paper board to produce a dependable, sturdy, grease-resistant container. The best bit? When you're finished, the whole thing can be recycled or composted at home, where it will disappear without a trace—just like a fruit peel.

Plastic-free without

The first
and only
government-
approved
plastic-free
coating

Only one coating has emerged as truly plastic-free —following a rigorous nine-month assessment, the Dutch government agency responsible for enforcing environmental regulations officially recognised Notpla’s unique material as the first and only coating to meet the EU Single-Use Plastic Directive’s strict definitions of plastic-free.

With thousands of other materials still classified as plastic, including those which claim to be “plastic-free”, this sets Notpla apart and supports our mission to reduce society’s dependence on plastic.

Guilt-free disposal, no matter what

Up until now, packaging has only been designed with one possible end-of-life scenario in mind. In the likely event that it doesn't reach its intended destination, there is no backup plan. At best, it clogs our landfills; at worst, it ends up in oceans or rivers.

This is where Notpla is different. No matter where our food containers end up, we've ensured they'll do no harm - even in general waste.

Wipe clean and recycle with paper

The natural coating doesn't prohibit it from paper recycling streams, giving a second life to the paper fibres

Home-compostable in six weeks

Safely break down in weeks and regenerate into fertile soil in a home-compost environment

General-waste guilt-free

Our packaging is carefully designed to degrade naturally and leave no trace, no matter where it ends up

More. magic

Notpla's collection of plastic-free solutions goes beyond food containers. We've created a range of innovative, seaweed-based products for the foodservice industry that vanish back into nature without any harmful traces. Now's the time for your business to stand out with true, sustainable solutions.

A drizzle of something new

Notpla's groundbreaking, pre-filled Food Oil Pipettes are a joy to drizzle over pizzas, pasta, salads or just about anything on your menu.

Made from our unique seaweed extracts, the entire pipette is 100% natural, even edible, and can be conveniently disposed of in food waste once it has served its purpose. Designed with more than just sustainability in mind, the pipettes are easy to open with a simple twist where a controlled release of oil drips soon follows.

Each robust 10ml vessel contains a single dose of high-quality food oil that can be selected from a range of flavours.

Notpla Olive Oil Pipette
20 x 65 mm (10ml)
Units per case: 700

Notpla Chilli Oil Pipette
20 x 65 mm (10ml)
Units per case: 700

Notpla Truffle Oil Pipette
20 x 65 mm (10ml)
Units per case: 700

The seaweed spoon saviour

While consumers are left with a bad taste in their mouths from rough, wooden spoons, the planet is even less impressed by PLA and paper laminated alternatives that create a damaging trail of microplastics.

So we created something that was better for everyone.

Made from our unique seaweed formula, the Notpla spoon remains stiff during use, while offering a smooth, tasteless experience - perfect for ice cream and frozen deserts. Once finished, it can be disposed of with normal food waste and will return to nature without a trace - no harm done.

Notpla Ice Cream Spoon
7 x 5 mm
Units per case: 1000

RICS001

Say it with Seaweed Paper

Entirely natural, Notpla's unique seaweed paper is our way of making sure nothing goes to waste.

Using a by-product from seaweed processing, this fully-printable paper brings a remarkable, natural aesthetic to every design to help you make your environmental efforts known.

Ideal for menu cards and flyers, it's compatible with a wide range of printing techniques to ensure your printed designs come to life with stunning clarity and precision.
