THE SIX SIDES OF CHILLING PERFECTION

MEET THE HOSHIZAKI CUBE

Every bartender will tell you about the importance of the ice quality for their craft of creating layers of taste and texture in a cocktail glass. Premium spirits and ingredients simply ask to be paired with nothing less than ice cube perfection. Hoshizaki cubes are extremely compact, dry, tasteless, consistently identical and slowly melting, allowing just the right amount of dilution – a combination of everything a bartender requires when it comes to aesthetics, taste and functionality of ice.

THE MARBLE EFFECT:

The appearance of the Hoshizaki cube is characterized by its clean edges and its transparency streaked by a marbling effect. This effect occurs, when the **CELL WALLS** block the freezing water's expansion from all sides, while reaching up to -30°C during the cubing process. As the temperatures go down, the water keeps expanding and marbles start to form as a sign of extreme density and compactness of every single cube.

We are proud to provide and continuously perfect the technology behind these dense, dry and exceptionally hard ice cubes. As the cubes are formed individually inside **A CLOSED-CELL SYSTEM**, there is no unpleasant bridging between the single cubes.

CUBE SIZES

Cube size: **XS-21**
Weight: 6 g

Cube Size: **S-25**
Weight: 13 g

Cube Size: **M-23**
Weight: 17 g

Cube Size: **L-STANDARD**
Weight: 23 g

Cube Size: **XL-32**
Weight: 31 g

WHEN CREATING THE WORLD'S MOST POPULAR ICE CUBES, THERE ARE THREE MAJOR CHARACTERISTICS THAT COME INTO PLAY:

PERFECT TASTE

Being free of all impurities, our cubes are a perfectly tasteless chilling agent for all types of culinary purposes without compromising the taste of your creation.

PERFECT SHAPE

Each cube is made individually by a dedicated spray of fresh water within a closed cell to achieve the highest possible compactness of an ice cube with the perfectly precise square shape.

PERFECT DILUTION

During the freezing process, the cell walls block the freezing water's expansion from all sides. This makes Hoshizaki ice cubes so exceptionally compact and hard, that they provide the exact rate of dilution needed for cocktails and long drinks.

MAXIMUM VERSATILITY FOR ENDLESS APPLICATIONS

FLAKE, NUGGET AND CUBELET ICE MAKERS

Our Flake, Nugget and Cubelet ice makers belong to the true allrounders of the Hoshizaki product line-up. These powerful, durable and sustainable machines are highly popular across different market segments, such as in food preparation/processing, as well as in hotels, bars, restaurants and catering businesses.

As the Flake, Nugget and Cubelet ice makers convert all water brought into the machine, the water consumption is equal

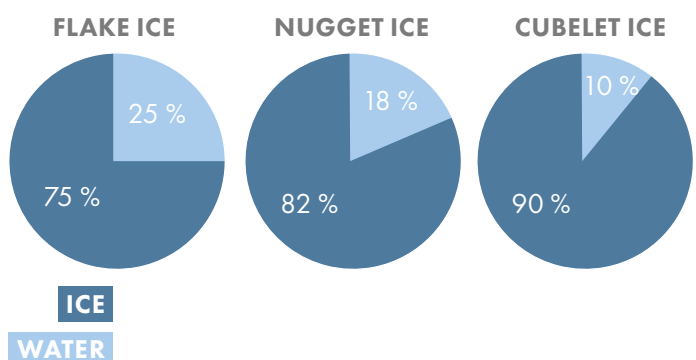

to its ice production. Additionally, all Flake and Nugget ice makers use the natural refrigerant R290, which is environmentally friendly and energy efficient.

Being proven free of all impurities and meeting even the strictest hygiene requirements, Hoshizaki flake ice is even used for organ transport and other medical purposes.

ICE-TO-WATER RATIO

The main characteristic of Hoshizaki's flake ice is that 'freeze burn' is prevented when displaying fresh fish or produce. The extruding head inside the Flaker exerts only a slight compression, producing the typical Hoshizaki ice flakes.

For Nugget ice, the extruding head performs a higher compression to yield **harder and dryer, individual** ice nuggets.

ABOUT FLAKE, NUGGET & CUBELET ICE

PERFECT TASTE AND HYGIENE

Being free of all impurities, our flake, nugget and cubelet ice is a perfectly tasteless chilling agent for all types of culinary purposes. This factor makes this ice very popular for medical applications as well.

VERSATILITY

Hoshizaki ice makers can produce either flake, nugget, cubelet ice. All ice types are highly versatile and a staple for different market segments and business types, such as; hotels, food production, bars and restaurants.

SUSTAINABILITY

All flake, nugget and cubelet ice makers use natural refrigerant R290, which is environmentally friendly and energy efficient. Additionally, it converts all fed-in water into ice and is therefore a device that can help you save water with every cycle.

*This type of ice is on special order only. Please take longer lead times into consideration.

FM Ice Makers - Modular

- Produces Flake or Nugget Ice
- FM ice makers can be converted to either flake or nugget ice
- Water consumption is equal to the ice production
- Main characteristic of Flake ice is that "freeze-burn" is prevented
- Nugget ice is compressed by the extruding head, producing harder, dry ice designed with hygiene as a priority.

DISCOVER THE NEW GENERATION

UNIQUE PURITY - HOSHIZAKI'S SIGNATURE ICE ... WITH AN EDGE

Just like the original Crescent ice makers, the new generation with the 'Edge' produces clear, crescent shaped ice. The unique shape is built from the inside out with an internal temperature of -4°C and can be used for chilling drinks, produce and bottle display, as well as for cooking.

One of the most striking features of our Crescent Edge ice is its round form and the flat bottom with two small winglets. This form behaves as the perfect drink chiller, as it is tasteless, absolutely clear, and slowly-melting.

Thanks to its rounded, yet edgy form, Hoshizaki Crescent ice will also not cluster inside the ice chest, always ready to be scooped out easily for immediate use.

USAGE AREAS

Hospitality

Catering

Healthcare

Food-
processing

Marine

CRESCENT ICE

KM Edge Cube
Weight: 10 g

The Crescent ice has **winglets**. Other than that, it has the same characteristics as the old version of KM.
(i.e. Clarity, pureness, temperature, roundness)

ABOUT CRESCENT ICE

DAMAGELESS BOTTLE COOLING

The ice is hard and compact, but thanks to the smooth, round surface it is the ideal ice type to prevent damages to bottles and labels.

APPETIZING DISPLAY

Due to the crystal clear ice, you can present your produce completely covered and perfectly protected, but still visible to your customer.

CHILLING DRINKS

Due to 0% impurities, the ice is perfectly tasteless and the optimal base for your cocktail creations.

OPTIMAL ICE TEMPERATURE

The temperature of the ice is exactly 0°C cold, hence unpleasant 'freeze-burns' are prevented. The ice is completely clear, allowing the produce to be covered entirely, which helps to maintain optimal temperatures around your vulnerable and delicate foods.

THE EDGE

The most unbeaten characteristic of Hoshizaki's Crescent ice is its unique form which allows splash-free serving of post mix soft drinks, whilst being the most economical ice, as it offers an optimal drink displacement.

NO CLUSTER

Round edges of the ice prevent clustering when keeping it in buckets for beverage cooling or in a fresh meat, fish or buffet display. Fresh produce or buffet bowls can be rearranged constantly, without any compromises on texture or taste of the produce.

Model Designation Example - KM Series

KM - 40 C - HC - W

Type of Ice

KM: Crescent ice maker

Type of machine

C: Development order

HC: Hydrocarbon R290

W: Fully automated chemical cleaning (optional)

Ice production capacity (kg/24h)

40 = approx. 40kg

KM Ice Makers - Self Contained

- Cycle Saver technology produces the double amount of ice per cycle.
- EverCheck Control Board with audible alarm and self-diagnostic features.
- Cleanest ice: Evaporator design features resistance to descaling acids and impurities
- Ergonomic: Door opens from top
- UV-LED light sterilizes water and water circuit. Sanitation mode automatically cleans the water circuit at a set frequency. (optional)
- Stainless steel exterior. Legs not supplied.

- Produces Crescent Edge shaped ice.
- Faster harvest cycle for increased production.
- Increased bonded surface area creates a stronger, more durable structure.
- The evaporator design freezes the cleanest water, rinsing-out most of the minerals and impurities; resulting in individual, crystal clear KM Edge cubes.
- Stainless steel surface.

PAIRING AESTHETICS AND FUNCTIONALITY

EYE CANDY FOR YOUR DRINKS

Expand your creative horizon and your craft's aesthetic possibilities with the help of our Special ice makers that produce different, extraordinary shapes of ice.

Specially tailored for cocktail bars that like to differentiate themselves from others, whilst never compromising on taste and quality of their drinks. With perfect ice characteristics still in focus, you can now add a decorative highlight to your cocktails and long drinks.

Our Special ice makers work, similar to our famous Cubers, with our patented closed-cell system.

Each ice shape is made individually by a dedicated spray of fresh water. This happens within a closed cell to achieve the highest possible compactness of an ice cube with the perfectly precise shape of a ball, star, heart, cylinder, big cube or long cube.

Owners of a Hoshizaki Special ice maker can look back on times of manually molding single ice forms. Now, they enjoy the convenience of scooping absolutely identical ice shapes from the built-in and easily accessible storage container.

SPECIAL ICE

SPECIAL ICE MAKERS

Stackable

Self contained

“Hoshizaki is a market leader when it comes to ice, but more than that, they are an inspirational brand ... creating ice in a different form, that allows you to be more creative behind the bar.”

Andrew Mullins

Operations Director
Fling Bar Services Dubai (UK/UAE)

THE RAPID FRESH MAKERS

WATER & ICE – IS THERE A BETTER TEAM?

Dispensers play a crucial role when business owners want to provide ice and/or water for self-service. The three steps of quality ice production, protected ice storage and the quick service of ice are all combined in one device – with the help of only one button your refreshment is ready in seconds.

With **DCM DISPENSERS** the user can select from these options:

- Cubelet ice only
- Cubelet ice and water
- Water only

The production capacities of these compact, yet powerful ice/water dispensers range from 60 kg a day for smaller businesses to up to 230 kg a day for sizable venues, such as amusement parks, hotel resorts and large-scale quick serve environment.

Most commonly, Hoshizaki dispensers are used, where a quick, efficient, and food-safe serving of ice-water combinations is needed.

DIM DISPENSERS produce and provide the famous Hoshizaki cubes for handy self-service. What makes this dispenser so popular is its convenient portion control, which can be set easily. This allows you to precisely regulate the serving sizes. This range of self-serve dispensers is often placed in hotels, positioned on each floor, to provide guests with quality ice all around the clock.

With an elegant and lean look, they almost disappear within modern interior designs. Focusing on user-friendliness and maximum food safety, air or light never hits the freshly produced ice, while stored, providing maximum contamination protection for operators and consumers.

DSM DISPENSERS are compact and reliable appliances that produce and serve high quality shuttle ice. The simple design and smart features, for food safety and against contamination, make DSM dispensers popular for hospitals and health care institutions.

EASY FIT

Our dispenser portfolio accommodates suitable appliances for different requirements regarding serving amounts, storage capacity and space limitations.

SUSTAINABLE

Waste control for more sustainability; these dispensers allow intuitive portion control. This helps to regulate the consumption of ice among end-user, reducing overall energy consumption and waste.

FOOD SAVE

As with all Hoshizaki machines, hygiene, food safety and contamination protection play a major role. Dispensers are operated by consumers directly. In order to eliminate health risks, the machines are designed to never let air or water hit the freshly produced ice, while stored.

Dispensers

Ice and/or Water Dispensers

- The DCM range of ice/water dispensers produce the following combinations: cubelet ice, ice and water or dispense only water.
- These systems can be used for multiple environments including food and beverage, leisure and healthcare.

Ice Dispensers

- The DIM-40DE-HC produces cubed ice and has a new exterior design. The freshly produced ice does not come in contact with light or air when stored and therefore maintains the highest quality. Its ice is very well suited for multiple environments including food and beverage, leisure and healthcare.

Water Filtration

- The 4HC-H water filtration system maximizes equipment performance, improves ice quality and will filter out dirt / rust particles as small as ½ micron, chlorine taste and odour reduction, reduces lime scale formation, reduces corrosion related problems due to chlorine vapour.
- NSF certified for bacteriostatic effects, this means the product limits the passage or growth of bacteria that may already exist in the incoming water.

External drain pump

The external drain pump is a practical accessory that can be installed onto all self-contained icemakers in the IM-series from the IM-21 to the IM-65 excluding the IM-65 LM, LM 103 and the Q model. When installed the drain pump gives you more flexibility and less constraints of connection to the drain when placing the icemaker. Rearranging the icemaker later on is also quicker and easier with the drain pump installed, and the risk of standing water or having the drain pipe clogged is close to eliminated.

Capacity and operating condition limitations:

- Maximum pump distance: 1.0m vertically / 10m horizontally
- Typical installation: condition 0.5m vertically / 5m horizontally
- Capacity: 200ltr/hour or 3.3ltr./min at max distance

EXTERNAL DRAIN PUMP

Snowflake GI Counters

1/1 GN

- Minimum cool air lost: double insulated and extra wide door gaskets help to keep the cold air in the cabinet.
- Both interior and exterior are built of stainless steel which is among the best choices for hygienic and food-safe cooking environments.
- Anti-tilt mechanism: extra-long drawers with u-shaped, telescopic rails.
- Multiple door-drawer combinations possible.
- Removable gaskets make sure you can clean the device thoroughly.

SOLID QUALITY FOR KITCHEN PERFECTIONISTS

The Hoshizaki PREMIER is a series of heavy-duty cabinets for energy-efficient refrigeration (Climate Class 4/5), catering to the needs of busy commercial kitchens. The durable design with solid door hinges, stainless steel and a flawless finish is built to withstand the most demanding kitchen operations. The PREMIER cabinets are available with legs instead of castors.

- ✓ Suitable for operations in ambient temperatures of up to +40°C
- ✓ Heavy-duty cabinets: climate class 4/5
- ✓ High performance: stable temperatures in the whole cabinet despite frequent door openings
- ✓ Meets Gastronorm & shelf size standards

PREMIER

KEY FEATURES

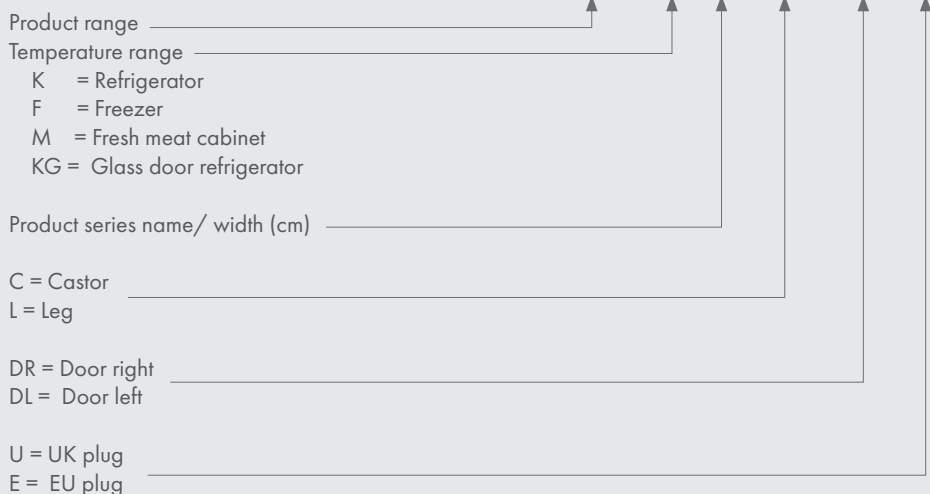

PERFECT TEMPERATURES FOR MAXIMUM FOOD SAFETY.

1. | Low noise levels
2. | 80mm insulation generate low energy consumption and high temperature stability (even during defrost cycles)
3. | Self-closing door at an angle of less than 90 degrees for food safety and energy-saving and easier working routines
4. | Full-height ergonomic handle for easy cleaning
5. | 304 quality stainless steel for durability and food safety
6. | Reversible door allows the appliances to be adapted to any individual installation site
7. | Automatic fan cutout switch
8. | Low maintenance condenser without filter (for 70, 140 cabinets)

Configuration variety & perfect temperatures

A refrigerated counter is a chef's prime workstation, meaning it will often take a central position in the kitchen. Besides its storage function, the counter plays a pivotal role from preparation through to arranging and serving the food.

PREMIER counters are refrigerated counters available in a variety of door/drawer combinations and worktop options to meet the individual requirements of your kitchen routine.

FEATURES FOR FLEXIBILITY

- GN 1/1 compatibility. Gastronorm pans can be inserted directly on the shelf supports or on the shelves.
- Left or right-hand hinged reversible doors. Doors can be reversed at customer site.
- Key lock on doors and drawers for most popular counter configurations.
- Soft-close drawers. Can be fitted at customer site using the Soft-Close Drawer Conversion Kit.
- 3/3 drawer sets are compatible with 150mm deep GN pans.
- Possibility to extend the height of castors by 50mm with Castor Extension Kit (optional accessory).
- Legs or castors.

HYGIENE & COOLING EFFICIENCY

The wide magnetic gaskets are removable for easy cleaning. The triple insulation area provides an effective seal, reducing the cold air escaping for maximum efficiency.

EASY MAINTENANCE

Compartmentalized cooling unit is extractable for easy maintenance.

6 WORKTOP OPTIONS

See next page

PREMIUM STAINLESS STEEL EXTERIOR AND INTERIOR

Stainless steel grade AISI 304

LONG DRAWER TELESCOPIC RAILS.

ERGONOMIC AND EASY TO CLEAN FULL LENGTH HANDLE

BODY HEIGHT OF 750MM

GOOD HYGIENE

Inside base shaped as a dished pan to catch fluids

SEAMLESS KITCHEN DESIGN

Thanks to the smart front venting design, no air flow is required to the underneath, sides or back of the unit.

This allows seamless integration into your kitchen design.

TEMPERATURE STABILITY FOR MAXIMUM FRESHNESS

The efficient fan-assisted cooling helps to maintain perfect storage temperatures at all times, preserving the taste, texture and nutritional content of your fresh goods. PREMIER counters and cabinets are designed to recover the inside temperature rapidly after each door opening and defrosting.

Understanding the Premier possibilities

WORKTOP OPTIONS & INSULATION BOARD

- PT: Prep Top worktop with insulated night lid*
- SL: Saladette worktop with insulated and hinged night lid*
- A1: Flat worktop with 100mm splashback**
- A5: Flat worktop with 50mm splashback**
- A: Flat worktop
- B: Insulation board without worktop

* Launch end of 2nd quarter 2024

** Available as accessory. Launch end of 3rd quarter 2024
also pre-configured for the most popular models

QUICK GUIDE

- Application areas: from hot commercial kitchens to the school lunch line. For back of house or as a workstation in front of house, cold buffets or as a serving station, use in production lines from raw materials to finished items and food preparation and storage at the point of preparation.
- Prep-counters (coming 2024) for catering and food processing, restaurants, bars or cafés. Snack counters are refrigerated low counters combined with modular cooking appliances.
- Heavy-duty cabinets: Climate class 5 refrigerators for hot professional kitchens. Climate class 4 freezers and 4 section refrigerators with drawers.
- High performance counters: stable temperatures despite frequented door openings.
- Compliant with 1/1 GN

ADVANCED CABINETS FOR RELIABLE REFRIGERATION

The Hoshizaki ADVANCE is a series of durable refrigeration and freezer cabinets, exceeding the requirements of demanding commercial kitchen environments. Having kept food safety, easy cleaning, and standardized application possibilities at the core of the design concept, the ADVANCE series is the perfect fit for diverse kitchen environments, from catering to large-scale projects, such as hotels and Quick Service Restaurants.

- ✓ Suitable for use in ambient temperatures of up to +40°C (tropicalised). Climate Class 5.
- ✓ Heavy-duty cabinets
- ✓ High performance cooling system , guarantees maximum temperature stability
- ✓ Meets 2/1 deep Gastronorm standard

USAGE AREAS

Catering Hospitality

KEY FEATURES

FOOD SAFETY AND EASE OF OPERATIONS

1. | Low noise levels
2. | Most efficient air distribution inside with a specially designed air channel.
3. | Removable gasket
4. | Full-height ergonomic handle for easy cleaning
5. | 430 quality stainless steel for durability and food safety
6. | Self-closing door at an angle of less than 90 degrees
7. | Monoblock design for maximum internal capacity and easy maintenance
8. | Automatic fan cutout switch
9. | Low maintenance condenser

SMALL FOOTPRINT. HIGH PERFORMANCE.

COMPACT 420 K

SMALLER HAS NEVER BEEN GREATER

With a reputation for delivering smart refrigeration solutions, Hoshizaki engineers cabinets for better storage solutions for Chefs and kitchen operators.

- ✓ The COMPACT GRAM series offers a rare combination: they are professional food safe cabinets with a compact size and with excellent energy ratings for its class.
- ✓ These small space storage cabinets are easy to fit in, especially when space is of a premium, making the COMPACT series a popular choice amongst small kitchen operators who do not require heavy duty gastronorm refrigeration.
- ✓ Ideal for commercial kitchens.
(Front of House/ Back of House)
- ✓ Suitable for operations in ambient temperatures of up to +30°C.
- ✓ Climate Class 4: normal-duty cabinets (KG - glass door refrigerators - are also climate class 4) Climate Class 3: glass door freezers.

USAGE AREAS

Catering

Hospitality

HOSHIZAKI-GRAM COMPACT

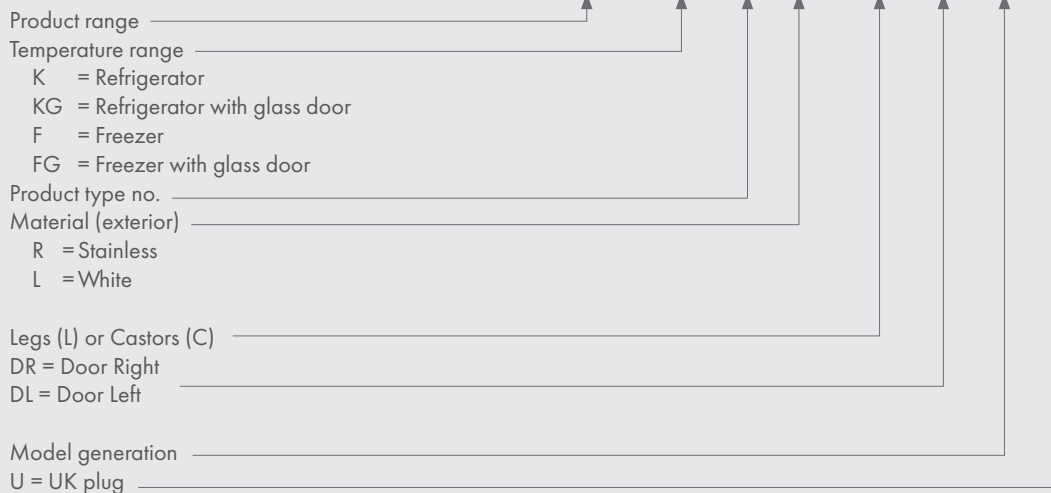

KEY FEATURES

1. | Low noise levels
2. | Air circulation system ensures temperature stability
3. | Removable door gasket for easy cleaning
4. | Full-height integrated handle. Easy grip and easy access for cleaning
5. | Removable door gasket for easy cleaning.
6. | Anti-spillage shelves with tilt prevention.
7. | Automatic defrost
8. | Built-in LED light (available in glass door cabinets only).
9. | Automatic re-evaporation of condensate water.

CONTROLLING AND MONITORING CRITICAL FOOD TEMPERATURES

GRAM KPS 42

MASTERING THE ART OF TEMPERATURE CONTROL

Blast chilling and freezing are integral parts of any cook-chill operation in food production. Possibilities to immediately chill or freeze cooked food for safe storage.

The GRAM KPS series has been designed to cover all regulations around the perfectly hygienic transition from cooking to chilling your valuable produce. With capacities ranging from 22 kg to 180 kg for blast chillers and 13 to 180 kg for blast freezers, this series offers suitable options for various kitchen layouts and purposes.

BLAST CHILL PRODUCTION OF FOOD

BLAST FREEZE PRODUCTION OF FOOD

GRAM KPS BLAST CHILLERS/FREEZERS

REACH-IN, ROLL-IN OR ROLL-THROUGH

Our goal is to always cater to the individual processes and requirements that come with different segments, guest capacities or space limitations. That is why this series offers a number of outstanding options.

REACH-IN models: 
KPS 21, 42

CH Blast Chiller with built-in cooling system	SH Blast Chiller/Freezer with built-in cooling system
CF Blast Chiller for connection with remote cooling system	SF Blast Chiller/Freezer for connection with remote cooling system

USAGE AREAS

Catering Healthcare* Education Hospitality Leisure

*Food storage only, not for bio-medical purposes

✓ This series is often chosen by restaurants, production kitchens or food production facilities which require efficient and effective methods to chill down and freeze already portioned food - always on point, with taste and texture always perfectly protected throughout the entire process.

FOOD SAFE

Food items handled in full compliance with the HACCP guidelines. HACCP alarms and an automatic shift to 'storage mode' are useful extras to help you to ensure highest food safety at all times.

HIGH FOOD QUALITY

Taste, texture, appearance as well as vitamins and nutrient content are preserved. Use of IFR function also protects against surface freeze damage.

VERSATILITY

Offers different operational modes: IFR operation, time or temperature controlled chill cycle. Up to 20 customized cycles can be stored.

MODULARITY AND SCALEABILITY

Capacities from 13 to 180 kg of food. Reach-in, roll-in or roll-through models for small or big scale operations. Part delivery or turn key.

GRAM PROCESS 21 / 42 – Blast Chiller/Freezer

1/1 GN

- Right hand hinged door.
- Removable support for 1/1 GN trays or bakery trays (600 x 400mm).
- IFR system prevents surface freezing damage. Maintaining storage temperature.
- Multipoint probe with 3 measuring points.
- HACCP alarms.
- LCD control panel.
- Encoder wheel for navigation.

HANDLING YOUR BAKERY PRODUCTS WITH TECHNOLOGICAL INNOVATIONS

QUICK GUIDE

- Special features: ideal for bakeries, confectioners and patisseries.
- High performance: perfect storage conditions despite frequent door openings.
- Perfect fit: meets standard bakery tray size requirements.
- BAKER 625, 550, 950, Quick Chiller/Freezers (SF), Retarder-Provers (GA): ideal for heavyduty operations, rated with climate class 5 and suitable for the use in ambient temperatures of up to +40°C with 40% relative humidity.
- Efficient air circulation system helps to maintain correct and uniform temperatures throughout the entire cold room.
- CE certified according to EN 60335-1 and EN 60335-2-89.

Innovations in Detail...

LEGS OR CASTORS
LEGS: 130 - 180 MM
CASTORS: Ø100 MM

- 1 LED lighting
- 2 Drip-proof display (IP21)
- 3 Standard models are supplied with an integral door lock
- 4 Full length air duct for optimized air flow
- 5 Removable door gasket for easy cleaning
- 6 Reversible and self-closing door
- 7 L-shape support rails for bakery trays. These can be individually positioned
- 8 Exterior and interior of stainless steel AISI 304
- 9 Pedal door opener with overload protection (not for BAKER 625). Same can be placed left or right side

STREAMLINED APPLICATIONS WITH ALL THE HOSHIZAKI-GRAM ADVANTAGES

➤ MODERN DESIGN PRINCIPLES & INVENTIVE TECHNOLOGY

HOSHIZAKI-GRAM BAKER refrigerators and freezers are based on our award winning design principles and innovative solutions. An efficient air circulation system is essential, providing indirect cooling and temperature stability and protecting your bakery products. Additionally, the electronic controls have safety functions for optimum protection.

➤ PRESERVING YOUR QUALITY BAKERY PRODUCTS

Our refrigerators prevent any undesirable drying out of the bakery products thanks to indirect airflow of the air distribution system. You can use the dry cooling function for lower humidity (M cabinets).

Our refrigeration technology has been developed to prevent any undesirable quality loss of your products, such as drying-out of dough and cakes.

HIGHLIGHTS BAKER M/F 550/950

BAKER 550: Bakery tray 400 x 600 mm - Lengthways insertion BAKER 950: Bakery tray 600 x 800 mm and 600 x 400 mm

- Indirect airflow of the air distribution system
- Skin formation or drying out of the bakery products is almost fully avoided
- The electronic controls have safety functions for optimum protection and filter change indicator
- Stainless steel cabinet with 25 sets of supports for bakery trays
- LED lighting
- Reversible door with lock
- Dry cooling function (M 550 and M 950)
- Easy removable door gasket (without use of any tools)
- Pedal door opener with overload protection

HIGHLIGHTS BAKER M/F 625

BAKER 625: Bakery tray 600 x 400 mm - Sideways insertion

- Indirect airflow of the air distribution system
- Skin formation or drying out of the bakery products is almost fully avoided
- The electronic controls have safety functions for optimum protection and filter change indicator
- Stainless steel cabinet with 20 sets of supports for bakery trays
- LED lighting
- Reversible door with lock
- Dry cooling function (M 625)
- Easy removable door gasket (without use of any tools)

GA TOUCH DISPLAY CONTROLLER

The 7-inch touch intuitive display controller is very easy to use and provides a clear overview of the current process status at all times. The operator can choose between 8 pre-set standard programs for easy startup. Additionally, the intuitive controller allows manual program setting for individual adjustments.

QUICK CHILLER/FREEZER CONTROLLER

Multiple operation modes – use as quick chiller/freezer or choose refrigeration or freezing storage mode. The SF series features a large display, so the ongoing process is easy to monitor.

See website for all model specifications at: hoshizaki-europe.com

BAKER GA 950

BAKER SF 950

HIGHLIGHTS BAKER GA/SF 550/950

BAKER GA 550: Bakery tray 400 x 600 mm - Lengthways insertion
BAKER GA 950: Bakery tray 600 x 800 mm and 600 x 400 mm

- Excellent for long-term dough processing
- Computer-controlled retarder-prover with individual program settings
- With steam generator for optimal humidity even during the fermentation process
- Multi-functional cabinet: Can be used as retarder-prover, storage refrigerator, storage freezer or thawing cabinet in accordance with the HACCP principles

BAKER SF 550: Bakery tray 400 x 600 mm - Lengthwise insertion
BAKER SF 950: Bakery tray 600 x 800 mm and 600 x 400 mm

- Excellent for long-term dough processing
- Multi-functional cabinet: Can be used as quick chiller/freezer, storage refrigerator, storage freezer or thawing cabinet in accordance with the HACCP principles

GRAM CHEST FREEZERS

Temperature

F -22/-14°C

Outside dimensions

Durable and flexible

There are four models within the range of our commercial chest freezers offering storage capacities from 323 ltr. to 566 ltr. They are manufactured to the highest specification and have a durable stainless steel lid.

- Adjustable thermostat, power indicator
- Stainless steel lid
- Lockable handle
- Protected drain to reduce blockages
- Supplied on castors as standard
- Exterior: White
- Interior: Hammered aluminium

Economical

All Gram commercial chest freezers have 60mm thick insulation to ensure fast and efficient freezing at very low operating costs.

Efficient

The cabinet is able to be quickly and efficiently cleaned. A protected drain makes defrosting a quick and simple task.

Commercial Chest Freezers

The Gram range of commercial chest freezers is designed to provide the professional operator with ideal solutions for their bulk storage requirements.

GRAM CHEST FREEZERS

- Adjustable thermostat, power indicator.
- Lift up stainless steel lid.
- Lockable handle.
- Defrost water drain.
- 2 or 3 wire baskets.
- Supplied on castors as standard.

BEER DISPENSER

**THANKS TO THE SPEED & RELIABILITY
OF THE BEERMATIC DUAL TAP WE
ARE ABLE TO SERVE BEERS TO LARGE
PARTIES AT A FASTER RATE, WHICH
ALLOWS TIME FOR A BARTENDER
TO FOCUS ON PROVIDING A TOP
QUALITY CUSTOMER SERVICE**

Giovanni Derpergola - Bar Consultant @Liquidalembic

AUTOMATION NEVER TASTED THIS GOOD

Multitasking is a key skill of every bartender. From taking orders, preparing cocktails and other drinks, processing payments and keeping the workspace clean to ensuring guests have their full attention and create a positive atmosphere. The BEERMATIC DUAL TAP is a fully automatic draft beer dispenser with a mechanism that also pours the head of the beer. The hands-free portion control allows a preset quantity of chilled draft beer and the head of the beer to be served - always at the perfect temperature. Beer after beer after beer.

Don't accept waste!

*Less waste with
Hoshizaki BeerMatic
technology*

The BEERMATIC is a great tool for cost control. Portions can be controlled accurately, without spillage of beer and/ or the head of the beer. Waste of draft beer is generally estimated to be as high as 20% per keg.¹

PERFECTLY POURED BEER AT THE TOUCH OF A BUTTON

CONSISTENTLY HIGH QUALITY BEER

The beer-to-head ratio can be adjusted to different types of beer or to meet local preferences. The system has the dispensing capacity of 65 litres, which means it can pour 130 perfectly chilled beers (0.5 ltr.) consecutively. An internal cooling system chills down the beer on its way from the keg through the machine, so that the draft beer can be served directly from ambient temperature kegs.

INCREASE REVENUE

Until the beer is poured, no additional attention is required. This creates time for additional tasks such as; processing payments, preparing orders or to clean up. These saved seconds seem marginal, but when serving large amounts of people, automated work-sharing becomes a measure for efficient crowd serving.

EASY TO FIT IN & INSTALL

The BEERMATIC is a space-saving device, as no additional refrigerator for the beer keg is needed. With its compact design and small footprint, this countertop dispenser fits into multiple environments. It can also be easily transported and installed for pop-up events and outdoor venues.

FUNCTIONAL FEATURES

1. PRESS ONCE TO DISPENSE

It's as simple as that. Press the dispense button once to draft the preset amount of beer.

2. TILT-POURING

The dispense operation is tilting the glass to the right angle to ensure perfectly poured beer.

3. PORTION CONTROL

The portion size can be preset to pour the same quantity every time, meaning no overflow.

4. HEAD OF BEER CONTROL

The head of beer portion can be set and adjusted for both taps individually.

5. INTERNAL COOLING SYSTEM

Ambient temperature beer is cooled down as it flows through the beer circuits.

6. TWO BEER CIRCUITS

This dual-tap model has two circuits, so two different types of beer can be connected and poured simultaneously.

7. COUNTING/LOG FUNCTION

The display shows the number of beers poured. Via the user settings, you can configure the number of beers, based on the volume of your glasses.

8. AUTOMATIC OR MANUAL DISPENSE MODE

It is a simple process to switch from automatic to manual dispense mode or vice versa via the operation panel.

9. EMPTY-KEG-ALERT:

A "SOLD OUT" lamp lights up in the control panel as soon as there is less than 0.5ltrs. left in the beer circuit.

HYGIENE AND FOOD SAFETY

Accurate portioning avoids spillage entirely, no cutting/skimming needed, and the workspace remains clean at all times. The dispenser's compartmentalized design is engineered to avoid contamination and to simplify cleaning routines. With this system you can reduce the glass-to-person contact points and maintain the highest standards of food safety, hygiene, and sanitization.

COST REDUCTION

The BEERMATIC is a great tool for cost control. Portions can be controlled accurately, without spillage of beer and/or the head of the beer. Waste of draft beer is generally estimated to be as high as 20% per keg¹. The internal refrigeration system allows you to store all of your kegs at ambient temperature which saves you energy costs and additional costs for a cold room or fridge.

OPERATIONAL FLEXIBILITY

Offering great flexibility, the dual tap allows you to connect two separate kegs with different types of beer at the same time. Additionally, the automatic tilting unit is compatible with all standard glass sizes. As the compact dispenser can be transported and installed easily, and because it doesn't require additional cooling, it is a great option for outdoor/temporary events.

PRODUCT LINE-UP

FASTER, SMARTER, CLEANER

LESS WASTE WITH HOSHIZAKI BEERMATIC TECHNOLOGY

NO OVERPOURING

Overpouring is a real cost factor and the added spillage can cause significant losses. Thanks to the accurate portion control function, this problem is eliminated.

NO WASTE

As soon as a keg gets too warm, excess carbon dioxide is released, which increases the head of the beer size. The beer will become slightly sour and even cloudy. The BEERMATIC's internal cooling system will help reduce the waste on the head of the beer from the beginning.

LESS STALE BEER

Keeping close track of beer sales reduces the overall problem of stocking beer that no one wants. A built-in counter in the display helps you keep an eye on real-time beer sales and provides the ability to track consumption trends overtime.

UNTAPPING ONLY EMPTY KEGS

Untapping a keg too early occurs because bartenders don't know if –or how much – beer is left in the keg. The BEERMATIC has an indicator showing when the keg is getting empty, eliminating guesswork, and helping you sell every last drop.

IMMEDIATE USE

Unlike traditional drafting systems that require beer kegs to be refrigerated for 24 hours before connecting to the tap, the BEERMATIC cools down each portion individually on its way from the keg into the glass.

HEAD OF BEER CONTROL

The beer to head ratio can be manually adjusted depending on local preferences and beer type.

PERFECT TEMPERATURE

The beer is poured into the glass at a controlled temperature between 2 - 8 °C.

GOOD FOOD COMES FROM FRESH INGREDIENTS

PROUDLY DISPLAY YOUR FRESH FISH, MEAT AND PERISHABLE PRODUCTS

Our line of refrigerated display cases combine innovative features with a modern and elegant design, and are configured to highlight and preserve the freshness of even the most delicate fish types.

The range is designed to maintain the most natural level of humidity and food-safe temperatures, even during peak serving times with frequent door openings.

The smooth and diffused airflow works without any forced air circulation. This method creates ideal conditions avoiding unpleasant dehydration and weight loss of the stored goods.

SIMPLE IS SMART

One of the strikingly simple solutions for easy and fast temperature control: The inside tray can be flipped face up or face down to set the perfect inside temperature for different types of fish.

The elevated side wings of the trays allow more air circulation, lowering the storage temperature instantly.

Tray facing up: More delicate fish types.

Tray facing down: Fish types that require lower storage temperatures.

1. | Tubular-shaped evaporator absorbs the heat continuously
Condensation freezes on its external surface, maintaining an attractive frost layer with no dripping
2. | Practical anti-slip top: ideal to place serving dishes
3. | Sliding door with 150 mm height, easily disassembled and removed for daily cleaning
4. | Curved glass for optimal visibility of the displayed food. With anti-scattering film for glass splinter protection
5. | Lightweight ABS trays with a wave-shaped profile, removable for easy cleaning
6. | The **condensing unit** of all our models sit either on the right- or left-hand side, with the outflow of air positioned on the sides away from the operator
7. | This model is equipped with LED lighting that can be turned on and off as needed
8. | A thermometer inside the cabinet helps you to monitor the inside temperature at all times

INSTALLATION COSTS

Hoshizaki ice machine and refrigeration standard deliveries are made kerbside during working hours with one man.

For the benefit of all parties Hoshizaki always recommends that all cabinets are inspected on delivery. Please make all of the checks that you feel necessary and when satisfied sign the delivery note. Contact details must be provided if a delivery is going direct to site. Special requirements should be advised at the point of order.

Hoshizaki also offer other additional services. Please contact the sales office for pricing. Please note; all additional service prices shown are net prices and not discountable.

For Ice Maker installations please refer to the 6 page ice machine flyer.

Installation costs applicable to clear access only and exclude costs for security or permit requirements.

Installation

(Installation includes the provision of an extra man, unwrapping, positioning and removal of packaging).

This applies only to a ground floor location with clear access.

(Excluding KPS 42, 60, 90, 120, 180, GA 950 and any remote Cabinets).

£135

A price is available for installation of the above listed units on request.

3 man team - including delivery and installation

£500

4 man team - including delivery and installation

£625

Extra man (without installation)

£180

AM/PM delivery

£55

Timed delivery

£75

Collection and disposal (UK Mainland only)

We are only able to collect an old cabinet when delivering a new one at the same time.

Cabinets must be fully defrosted and emptied prior to collection. If the collection fails or is cancelled, charges may still be incurred.

Under counters, Chest freezers

£100

Single door upright

£105

Double door

£125

Counters

£125

Particular site circumstances should be reported to Hoshizaki at the time of placing your order.

If we are collecting cabinets for disposal larger than a K/F220 an extra man may be required unless additional help is on site.

Installations/Special delivery charges are subject to change.

GENERAL CONDITIONS OF DELIVERY, HOSHIZAKI EUROPE B.V.

- All items delivered must be unpacked and checked for any damage whilst the driver is on site. The customer's signature will be taken to confirm that this has been done. Please advise your customers of this.
- Hoshizaki will not be held responsible for any items that are signed for to be in good condition and later found to be damaged.
- We cannot ensure morning or afternoon deliveries. We can request them, but they are not guaranteed unless the additional charge has been agreed.
- Site contact name and number must be provided if a delivery is going direct to site.
- If any obstacles are involved, i.e. units to be taken up stairs, please advise this when placing the order. An extra man should be requested when ordering any unit which is larger than the Gram Compact 220, unless there is help available on site.
- Please advise of any access/delivery restrictions.

Damaged deliveries

- The drivers manifest must be signed for as damaged. All transport damage should be reported (with supporting images) to the office within 24 hours of receipt. Drivers paperwork must be signed for as damaged.
- Delay to notify Hoshizaki may result in non-payment of damage allowance or refusal to replace goods.
- Hoshizaki will not be held responsible for any items that are signed for to be in good condition and later found to be damaged.
- Hoshizaki will consider requests to return machines on a case by case basis.
- A restocking charge may apply and customers are responsible for return of the goods in new condition in original packing.
- An RMA document / number will be issued for authorised returns.
- Charges may apply if units are returned with damage or packing is missing / marked.
- Hoshizaki is unable to accept return of used equipment.
- Unauthorised machines will be refused and returned to sender.
- Hoshizaki reserves the right to refuse credit.

Please contact the sales office for costs and further information.

Missing items

Any missing items must be reported in writing within 24 hours of delivery. Hoshizaki are unable to replace missing items without charge outside of this time.

Return items

- Hoshizaki will review a request to return any machine once the following criteria has been adhered to:
- The unit must be within 30 days of delivery.
- The unit must be as new and unused with packing intact including its pallet, as delivered.
- The unit and packaging must be free of damage.
- The customer is responsible for the return of the unit to our warehouse / factory in Telford.
- Before the unit is returned the customer must make a request to the sales office in writing requesting the return of the machine with full details.
- The customer will then be advised of the returns policy

If all criteria is met an RMA number / label and advise will be issued. An official order must be received to cover the restocking charge before the returns paperwork can be issued.

Once the unit has been returned it will be inspected and we will be advised of its condition. If the unit and packaging does not comply with the criteria you will be notified. Collection of the unit and costs will be the responsibility of the customer. A credit note will be issued once all criteria are met.

Please note: Special order machines cannot be cancelled or returned.

GENERAL CONDITIONS OF DELIVERY OF HOSHIZAKI EUROPE B.V.

1 Definitions

1.1. In these general conditions, the terms below are defined as follows:

Agreement: The agreement concerning the sale of Products by Hoshizaki and the purchase of Products by the Buyer.

Buyer: The person who purchases the Products under the Agreement.

General Conditions of Delivery: The present general conditions of delivery of Hoshizaki Nederland Europe B.V.

Hoshizaki: Hoshizaki Europe B.V., a company incorporated in the Netherlands with its registered offices in at Burgemeester Stramanweg 101, NL – 1101 AA Amsterdam, the Netherlands and its principal place of business in (1101 GC) Amsterdam, the Netherlands at Burgemeester Stramanweg 101, and with a registered UK establishment (number BR002790) known as Hoshizaki UK whose address is 2 The Technology Centre London Road, Swanley, BR8 7AG.

INCOTERMS: The Incoterms 2010 rules.

Intellectual Property Rights: Patents, rights to inventions; copyright and neighbouring and related rights, all other rights in the nature of copyright; trade marks; domain names; rights in get-up; goodwill and the right to sue for passing-off; rights in designs; database rights; and all other intellectual property rights, in each case whether registered or unregistered.

2 Applicability

2.1. These General Conditions of Delivery apply to and are incorporated into all quotations and offers made by Hoshizaki, and each acceptance, confirmation and validation by Hoshizaki of the orders placed by the Buyer and all "Agreements" unless and in so far as otherwise is expressly agreed in writing signed by Hoshizaki.

2.2. Any conditions and provisions that are stated in any documents that the Buyer issues before or after Hoshizaki issues any document in which the present General Conditions of Delivery are set out or are referred to are expressly rejected by Hoshizaki and set aside. The conditions concerned do not apply to any sale made to the Buyer by Hoshizaki and are in no way whatever binding on Hoshizaki.

3 Offers/Agreements

3.1. All quotations issued by Hoshizaki are non-binding invitations to the Buyer to place an order. Any order placed by a Buyer is an offer to purchase the relevant Products on these General Conditions of Delivery. An Agreement is concluded if Hoshizaki accepts the order in writing or Hoshizaki commences fulfilment of the order.

3.2. Changes made to an Agreement are binding on Hoshizaki only in so far as Hoshizaki accepts these changes in writing or in so far as Hoshizaki has actually begun implementing the changed Agreement.

3.3. Hoshizaki is entitled to refuse orders or to set certain conditions for the delivery of Products unless otherwise is expressly determined.

4 Prices/Payments

4.1. Unless otherwise stated, the prices of Hoshizaki are given in euros. If prices are given in another currency, then Hoshizaki may increase the price charged to reflect any change in the euro exchange rate between the date that the Agreement is made and the date that Hoshizaki submits its invoice.

4.2. All prices exclude VAT, duties and any other comparable levies that are imposed in connection with the sale of Products (unless otherwise is expressly stated) and the Buyer shall pay such sums in addition to the price.

4.3. All prices that are stated on price lists, in catalogues, quotations or other statements or listings of Hoshizaki are based on delivery in accordance with the INCOTERMS applicable under clause 5 may invoice the Buyer.

4.4. Unless agreed otherwise in writing between Hoshizaki and the Buyer, Hoshizaki may invoice the Buyer for any additional cost payable by the Buyer under the applicable INCOTERMS.

4.5. The Buyer shall pay Hoshizaki's invoices within thirty (30) days after the invoice date, unless otherwise agreed in writing between Hoshizaki and the Buyer.

4.6. All payments shall be made into the account nominated by Hoshizaki from time to time.

4.7. If deliveries are made in instalments, each instalment may be invoiced separately. No discount shall be given for early payment, unless Hoshizaki consents to such a discount in writing.

4.8. In addition to all other legal rights and remedies that Hoshizaki might have, interest shall be charged, as permitted by law, on all overdue payments at a rate of eighteen per cent (18%) annually or – if it is higher – at the statutory interest rate from the date payment falls due to the date on which payment is made in full.

4.9. In addition to the amount due, increased by the interest charged in accordance with Clause 4.8, the Buyer shall reimburse Hoshizaki for all costs and expenses that Hoshizaki incurs or suffers as a consequence of the non-payment or late payment on the part of the Buyer, including all costs of any debt recovery or enforcement action that Hoshizaki may take against the Buyer.

4.10. If Hoshizaki reasonably considers, including (without limitation) as a result of a change in the Buyer's credit rating with any reputable credit reference agency, that the financial situation of the Buyer is at any time such that it would not be sensible to start or continue production or delivery of Products on the basis of the aforementioned payment conditions, then Hoshizaki may require full or partial payment in advance or require other payment conditions as a condition for production or delivery of the Products.

4.11. If the Buyer fails to pay on the date they fall due any sums owed to Hoshizaki under the Agreement or otherwise, or if the Buyer is otherwise in default of its obligations under the Agreement:

4.11.1. Hoshizaki may suspend delivery of Products until the Buyer has paid the amounts due in full and has remedies any other default; and

4.11.2. Hoshizaki may require payment in advance for any future deliveries.

4.12. The rights in Clause 4.11 are in addition to and not instead of any other rights and legal remedies which apply or which are available by virtue of the Agreement or the law.

5 Deliveries

5.1. Delivery of Products shall take place Ex-Works (EXW), (INCOTERMS), unless:

5.1.1. the Buyer is established in one of the following countries, in which case the delivery of Products shall take place Carriage and Insurance Paid To (CIP) (INCOTERMS): the Netherlands, Belgium, Luxembourg, Great Britain, Ireland,

France, Germany, Austria, Switzerland, Spain or Portugal; or

5.1.2. the parties agree otherwise in writing.

5.2. Hoshizaki is entitled to deliver Products in stages (partial deliveries).

5.3. The dates of delivery given or confirmed by Hoshizaki are only approximate dates. Hoshizaki shall use reasonable endeavours to make delivery on those dates or within a reasonable period before or after those dates, provided that the Buyer provides all necessary order and delivery data within a reasonable period before the delivery date concerned.

5.4. The Buyer shall inform Hoshizaki in writing if the delivery has not taken place and shall give Hoshizaki a period of thirty (30) days to make delivery. If Hoshizaki does not deliver those Products within this period of thirty (30) days, then the Buyer may, as the only and exclusive legal remedy, cancel its order to the extent only that it relates to those Products.

5.5. Title in the Products is transferred to the Buyer in accordance with the provisions in Clause 7.1. The risk in the Products is transferred to the Buyer in accordance with the applicable INCOTERMS.

5.6. If the Buyer does not take delivery of the Products in accordance with the applicable INCOTERMS, then Hoshizaki may store the Products and if Hoshizaki does so, the Buyer shall pay to Hoshizaki as a debt on demand Hoshizaki's costs in doing so.

6 Returns

6.1. The Buyer may refuse to accept the Products when the Products arrive at the named place of destination if the Products are delivered CIP INCOTERMS, or when Hoshizaki delivers them at the named place of delivery if the Products are delivered EXW INCOTERMS, provided that:

6.1.1. the Buyer shall inform Hoshizaki of the refusal immediately;

6.1.2. the Buyer shall pay Hoshizaki a failed delivery fee, at Hoshizaki's then current rate for such charges.

6.2. The right of refusal in Clause 6.1 does not apply to any Products that have been designed or manufactured specially to the Buyer's own requirements.

6.3. This clause 6 shall not affect the Buyer's remedies for a breach by Hoshizaki of the warranty at clause 9 or any other provision of the Agreement.

7 Retention of Title

7.1. Title in the Products remains vested in Hoshizaki until the moment that all sums payable by the Buyer to Hoshizaki under the relevant Agreement are received by Hoshizaki in cash or cleared funds.

7.2. Until title in the Products passes to the Buyer, the Buyer shall:

7.2.1. store the Products separately from all other Products held by the Buyer so that they remain readily identifiable as Hoshizaki's property;

7.2.2. not remove, deface or obscure any identifying mark or packaging on or relating to the Products;

7.2.3. maintain the Products in satisfactory condition and keep them insured against all risks for their full price from the date of delivery;

7.2.4. notify Hoshizaki immediately if the Buyer becomes subject to any of the events listed in Clauses 15.1.4; and

7.2.5. give Hoshizaki such information relating to the Products as Hoshizaki may require from time to time.

7.3. Subject to Clause 7.4, the Buyer may resell or use the Products in the ordinary course of its business (but not

GENERAL CONDITIONS OF DELIVERY OF HOSHIZAKI EUROPE B.V.

otherwise) before Hoshizaki receives payment for the Products. However, if the Buyer resells the Products before that time:

- 7.3.1. it does so as principal and not as Hoshizaki's agent; and
 - 7.3.2. title to the Products shall pass from Hoshizaki to the Buyer immediately before the time at which resale by the Buyer occurs.
- 7.4. If before title to the Products passes to the Buyer the Buyer becomes subject to any of the events listed in Clauses 15.1.2 to 15.1.4, then, without limiting any other right or remedy Hoshizaki may have:
- 7.4.1. the Buyer's right to resell the Products or use them in the ordinary course of its business ceases immediately
 - 7.4.2. Hoshizaki may at any time require the Buyer to deliver up all Products in its possession that have not been resold, or irrevocably incorporated into another product; and
 - 7.4.3. if the Buyer fails to do so promptly, enter any premises of the Buyer or of any third party where the Products are stored in order to recover them.

8 Force Majeure

- 8.1. Hoshizaki is not liable for any failure to perform or any delay in performing its obligations under an Agreement if:
 - 8.1.1. the failure or the delay is the result of interruptions in the production process of the Products; or
 - 8.1.2. the failure or the delay is the result of Force Majeure Event.
- 8.2. If the period of delay or non-performance referred to in clause 8.1 last for a consecutive period of three months, or if Hoshizaki reasonably expects it to last for a period of three or more consecutive months, then Hoshizaki may terminate the Agreement without liability to the Buyer resulting from such termination.
- 8.3. If, when a Force Majeure Event arises, Hoshizaki has already fulfilled some of its obligations ensuing from the Agreement, then Hoshizaki may invoice for the actions already performed separately and the Buyer is required to pay this invoice.

9 Product Warranty

- 9.1. Hoshizaki warrants that, under normal use in accordance with the accompanying user's manual, that at the time of delivery to the Buyer and for twenty-four (24) months from the delivery date (or another period that the parties might have agreed to in writing) the Products shall be free from material defects and shall substantially conform with the specifications of Hoshizaki for the Product concerned or, if applicable, other specifications to which Hoshizaki has consented in writing.
- 9.2. The only obligation of Hoshizaki and the only remedy of the Buyer in connection with claims ensuing from the warranty at Clause 1 is limited, at the discretion of Hoshizaki, either to the replacement or repair by Hoshizaki (or by a distributor/dealer appointed by it or a recognized and qualified maintenance service) of a defective Product or a Product that does not meet the specifications, or to the reimbursement of the purchase price of the Product. Hoshizaki shall be granted a reasonable period of time for the repair, replacement or allocation of a reimbursement. The Products that do not meet the specifications or defective Products shall become the property of Hoshizaki as soon as they are replaced or reimbursement has been awarded for such.
- 9.3. Notwithstanding the previous Clause 9.2, Hoshizaki has no obligations on the basis of the warranty at clause 8.1 if the asserted defect or the non-fulfilment of the specifications can be ascribed to power failures or the incorrect connection of the Product to the elec-

tricity grid, the incorrect connection of or defects in the water supply or drainage to and from the Product, respectively, tests conducted under circumstances of special use, incorrect use, use in another manner than is described in the user's manual, insufficient care, faulty installation or an accident, or to faulty repair, adaptations or changes or storage, or incorrect transport, or incorrect handling, cleaning or maintenance of the Product.

- 9.4. The warranty in Clause 9.1 is given directly to the Buyer and not to the Buyer's customers.
- 9.5. To the fullest extent permitted by law, any warranties not set out in these General Conditions of Delivery (including, without limitation, the warranties implied by sections 13 to 15 of the Sale of Goods Act 1979) are excluded. The Buyer agrees and acknowledges that it has not relied on and shall have no remedies in respect of any warranties or representations not set out in these General Conditions of Delivery (provided that nothing in the Agreement shall limit or exclude Hoshizaki's liability for fraud).

10 Liability

- 10.1. Hoshizaki shall have no liability arising out of or in connection with the Agreement, whether in contract, tort (including negligence), breach of statutory duty or otherwise for:
 - 10.1.1. lost profit or revenue;
 - 10.1.2. lost savings;
 - 10.1.3. loss of reputation;
 - 10.1.4. loss of goodwill;
 - 10.1.5. damages of an indirect, special, or consequential nature; or
 - 10.1.6. damages imposed as a fine.
- 10.2. The aggregate liability of Hoshizaki towards the Buyer arising out of or in connection with the Agreement, whether in contract, tort (including negligence), breach of statutory duty or otherwise is shall not exceed an amount equal to the price paid to Hoshizaki by the Buyer under the Agreement in the twelve months prior to the event giving rise to the first claim by the Buyer.
- 10.3. Any claim by the Buyer shall be notified to Hoshizaki in writing by the Buyer setting out full particulars within thirty (30) days after the date of the first event which is the basis of the claim. Any legal proceedings related to such a claim must be issued within one (1) year after the date of the first event which is the basis of the claim. The Buyer shall be deemed to waive any claims in respect of which it does not comply with this Clause 10.3.
- 10.4. Notwithstanding anything to the contrary in these General Conditions of Delivery, nothing in the Agreement shall limit or exclude Hoshizaki's liability for:
 - 10.4.1. death or personal injury caused by Hoshizaki's negligence;
 - 10.4.2. Hoshizaki's fraud or fraudulent misrepresentation;
 - 10.4.3. any other liability that cannot be so limited or excluded by law.

11 Intellectual Property Rights

- 11.1. Upon delivery of Products to the Buyer, Hoshizaki grants to the Buyer, a non-exclusive and non-transferable limited licence to use and to resell those Products, provided that the Buyer shall not without the prior written agreement of Hoshizaki modify, adapt, reverse-engineer, or reproduce the Products.
- 11.2. Nothing in the Agreement shall affect the ownership of any Intellectual Property Rights in the Products.
- 11.3. Hoshizaki shall, at its own cost: (i) conduct the legal defence if a third party institutes legal proceedings against the Buyer, in so far as these legal proceedings involve a claim asserting that any Product delivered

by Hoshizaki under an Agreement directly infringes upon the Intellectual Property Rights of the claimant; and (ii) indemnify the Buyer against the payment of damages and costs that are imposed in the final judgement in such legal proceedings, in so far as this judgement can be directly and exclusively ascribed to the infringement in question. Hoshizaki's liabilities under this Clause 11.3 are subject to Clause 10.2.

- 11.4. Hoshizaki shall have no obligation or liability towards the Buyer under Clause 11.3 if:
 - 11.4.1. Hoshizaki is not: (i) informed immediately in writing of a claim to which Clause 11.3 applies; (ii) given the exclusive right to take control of and organise the research, the preparations, the defence and the settlement in the context of such a claim, including the selection of legal counsel; and (iii) is not given full support and cooperation on the part of the Buyer in the context of the research, the preparations, the defence and the settlement as mentioned above; or if
 - 11.4.2. the action is instituted after the expiry of a period of three (3) years after the date of delivery of the Product.
- 11.5. If, in respect of a Product, legal action is instituted citing infringement of the sort referred to in Clause 11.3, or if, in the opinion of Hoshizaki, such legal action is likely to occur, then Hoshizaki may at its sole discretion
 - 11.5.1. obtain the right for the Buyer to use and resell the Product;
 - 11.5.2. replace the Product;
 - 11.5.3. to adapt the Product in such a manner that, in its new form, the Product no longer makes any infringement or
 - 11.5.4. to terminate an Agreement in so far as this pertains to the Product in question.
- 11.6. Clauses 11.3 and 11.5 set out the Buyer's sole remedy for any actual or alleged infringement of third party Intellectual Property Rights in connection with the Agreement.

12 Confidentiality

The Buyer acknowledges that all technical, commercial and financial data that is disclosed by Hoshizaki and/or companies affiliated with it to the Buyer are a part of the confidential information of Hoshizaki and or companies and legal entities affiliated with it. The Buyer is forbidden to disclose any of this confidential information to third parties or to use it for any other purpose than that which the parties have agreed in writing.

13 Export/Import Regulation

- 13.1. If for the delivery of Products in the context of the Agreement, an export or import licence must be granted by a government and/or any governmental body by virtue of any applicable law or regulations, or the delivery is otherwise restricted or forbidden by law or regulations governing the regulation of exports or imports, then Hoshizaki may proceed to suspend its obligations and the rights of the Buyer with respect to the delivery in question until the required licence is granted or for the duration of the relevant restriction and/or the relevant ban and Hoshizaki may terminate the Agreement without thereby incurring any obligation towards the Buyer.
- 13.2. If an end-user statement is required, Hoshizaki shall inform the Buyer of this promptly and the Buyer shall send this document to Hoshizaki at the first request for it by Hoshizaki; if an import licence is required, the Buyer shall inform Hoshizaki of this immediately and the Buyer shall send this document to Hoshizaki as soon as it is available.
- 13.3. By accepting the quotation of Hoshizaki, by entering into any Agreement and/or by accepting Products,

GENERAL CONDITIONS OF DELIVERY OF HOSHIZAKI EUROPE B.V. – continued

the Buyer consents to refrain from any manner of using the Products and/or the documentation pertaining to them if he thereby would violate law and regulations concerning the regulation of exports or imports.

14 Assignment And Set-Off

- 14.1. The Buyer is not permitted to assign, change, declare a trust over or otherwise deal with any rights or obligations under the Agreement without the prior written permission of Hoshizaki.
- 14.2. The Buyer is not entitled to withhold or lower any payments, or to set off current and future receivables against any payments that are owed for Products which have been sold in the context of the Agreement or any other agreement that the Buyer or one of the companies affiliated with him possibly has with Hoshizaki.
- 14.3. The Buyer promises to pay the payments due in full without taking into consideration any claimed set-off which the Buyer claims or is claimed on his behalf.

15 Breach and Termination

- 15.1. Without limiting its other rights or remedies, Hoshizaki may terminate this Contract with immediate effect by giving written notice to the Buyer if:
- 15.1.1. the Buyer commits a material breach of any term of the Contract and (if such a breach is remediable) fails to remedy that breach within 7 days of that party being notified in writing to do so;
- 15.1.2. the Buyer takes any step or action in connection with its entering administration, liquidation or any composition or arrangement with its creditors, being wound up (whether voluntarily or by order of the court), having a receiver appointed to any of its assets or ceasing to carry on business or, if the step or action is taken in another jurisdiction, in connection with any analogous procedure in the relevant jurisdiction;
- 15.1.3. the Buyer suspends, threatens to suspend, ceases or threatens to cease to carry on all or a substantial part of its business; or
- 15.1.4. the Buyer's financial position deteriorates to such an extent that in Hoshizaki's opinion the Buyer's capability to adequately fulfil its obligations under the Contract has been placed in jeopardy.
- 15.2. On termination of the Contract for any reason the Buyer shall immediately pay to Hoshizaki all of Hoshizaki's outstanding unpaid invoices and interest.
- 15.3. Termination of the Contract shall not affect any of the parties' rights and remedies that have accrued as at termination, including the right to claim damages in respect of any breach of this Contract that existed at or before the date of termination.
- 15.4. Any provision of the Contract that expressly or by implication is intended to come into or continue in force on or after termination shall remain in full force and effect.

16 Applicable Law and Choice of Jurisdiction

- 16.1. The Agreement and any claims or disputes arising out of or in connection with it or its subject matter or formation (including non-contractual disputes and claims) shall be governed and construed in accordance with the laws of England and Wales.
- 16.2. Any claims or disputes arising out of or in connection with the Agreement or its subject matter or formation (including non-contractual disputes and claims) shall be subject to the exclusive jurisdiction of the courts of England and Wales except that Hoshizaki may make such a claim in any court of competent jurisdiction.

- 16.3. The United Nations Convention on the International Sale of Goods shall not apply to the Agreement.

17 Other Provisions

- 17.1. If, as the result of the determination of a competent court or as the result of any future action of a legislative or administrative body, one or more provisions of the present General Conditions of Delivery become invalid or unenforceable, this shall not affect the validity or the tenability of the other provisions.
- 17.2. If, in the last case, the determination is made that any provisions of the present General Conditions of Delivery are not legal or are unenforceable, then the provision in question shall be considered to be removed from these General Conditions of Delivery, while all the other provisions shall continue to be fully valid and in effect, and the provision that is deemed illegal or unenforceable shall be replaced by a provision to the same effect that reflects the original purpose of the provision in so far as this is legally permissible.
- 17.3. If one of the parties neglects to make use of any right or legal means based on the Agreement, or if use is made of the same only after some time has passed, this may not be seen as the waiver of that right or legal means, nor shall any single instance of making use of such a right or legal means fully or partially lead to the exclusion of any further or future use of the same or to the exclusion of making use of any other right or legal means based on the Agreement or any associated document or the law.
- 17.4. Hoshizaki is entitled at any time to change and/or to amend these General Conditions of Delivery at any time prior to entering the Agreement. Changes and/or amendments shall take effect after they have been brought to the attention of the Buyer and have no retroactive effect.
- 17.5. If these General Conditions of Delivery are agreed between the parties in a language other than English, then the text and the meaning of the English language General Conditions of Delivery shall nevertheless prevail.
- 17.6. No person who is not party to the Agreement shall have any right to enforce any term of the Agreement.
