

Environmental Policy

It is the policy of Ascot Wholesale to ensure that we:

- Make sure we carry out audits of all new suppliers to ensure that their products are produced in compliance with all environmental legislation;
- Purchase goods and procure services which - as far as possible - reflect up-to-date specifications or standards for environmental sustainability;
- Promote a culture of environmental responsibility throughout the company through training and education;
- Recycle all office and warehouse waste wherever possible;
- Use EDI methods for invoicing and communication where possible, reducing our paper consumption;
- Take all reasonable steps to reduce energy consumption within the company by having a fully insulated warehouse, switching off lights, and using energy efficient light fittings where appropriate;
- Make every effort to reduce energy consumption in our distribution methods by purchasing vehicles with the most up-to-date energy management systems.
